

Mohamed Moamen | Full Stack Developer (PHP Laravel | React.js)

mohamedmoamen96@gmail.com | +20 1142933127 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Giza, Egypt

PROFESSIONAL SUMMARY

Full Stack Developer specializing in PHP Laravel and React, with hands-on experience in building responsive web applications, API integration, and real-time features. Skilled in translating Figma designs into responsive interfaces, implementing authentication, role-based access control, and database-driven applications. Previous professional background in network engineering with 3+ years of experience.

PROFESSIONAL EXPERIENCE

Huma Volve | Backend Developer Intern | Sep 2026 | 1 Week | [Certificate](#)

- Worked with GitHub, Postman, and ClickUp in a professional software development workflow, completing assigned backend tasks.
- Analyzed business requirements through SRS documentation and Figma designs, reviewed and refactored AI-generated code, and applied Clean Code practices.
- Learned and applied Laravel Jobs & Queues through practical tasks, gaining hands-on experience with asynchronous backend processing.

AfaaqWare | Frontend Developer Intern – Level 2 | May 2026 - Aug 2026 | 180 Hours | [Certificate](#)

- Developed responsive and reusable Frontend components for the SurveyLand project using Next.js, TypeScript, Tailwind CSS, and React Query.
- Integrated Frontend applications with REST APIs, implemented Figma designs, and reviewed the team's pages to ensure consistency and quality.
- Collaborated in a cross-functional team using Git Flow, Pull Requests, Code Reviews, ClickUp, and Agile workflows.

AfaaqWare | Frontend Developer Intern – Fundamentals | Apr 2026 | 55 Hours | [Certificate](#)

- Applied Git Flow, branching strategies, Pull Requests, and team workflows.
- Applied Atomic Design, Clean Architecture, multilingual support (AR/EN), light/dark modes, error handling, and a central API layer in a practical project.
- Built responsive UI from Figma designs, integrated REST APIs using Postman, React Query, and Next.js, and applied reusable components, design systems, and UI state management.

ECOTEL | Network Engineer | Aug 2021 - Jan 2025

- Managed network infrastructure including switches, routers, firewalls, and servers across multiple sites, ensuring optimal performance and uptime.
- Implemented security solutions using Forcepoint firewalls and DHCP configurations, ensuring data protection and network security.
- Performed preventive maintenance and troubleshooting, resolving issues and minimizing downtime.
- Organized structured cabling systems with patch panels and color-coding, improving network organization and maintainability.

SOFTWARE PROJECTS

SurveyLand | Frontend Project – AfaaqWare Training | [Demo](#) | [GitHub](#)

Full-featured survey management platform for creating, sharing, and collecting survey responses.

- Developed a responsive survey management platform using Next.js, TypeScript, Tailwind CSS, and React Query, enabling users to create, share, and manage surveys and collect responses.
- Implemented 29 features across 31 UI screens, integrating with 33 REST API endpoints for authentication, survey management, question handling, response collection, and data export.

- Built reusable and responsive UI components based on Figma designs, supporting both Arabic RTL and English LTR interfaces and ensuring a consistent user experience across the platform.

E-Commerce Full Stack Application | Full Stack Project | [GitHub](#)

Full-stack e-commerce platform with comprehensive user and admin functionality.

- Engineered a complete e-commerce solution using Laravel API and React.js with user authentication, product browsing, shopping cart, checkout process, and order management workflow.
- Integrated role-based access control enabling admins to manage products, assign delivery members, and track order status through a dedicated admin dashboard.
- Implemented advanced SQL queries and CRUD operations with MySQL database, including file upload functionality for product images.

Real-Time Chat Application | Full Stack Project | [GitHub](#)

WebSocket-powered instant messaging platform with secure authentication and message persistence.

- Developed real-time chat application using Laravel API and React.js with instant messaging via WebSockets powered by Laravel Reverb.
- Implemented high-performance broadcasting system for instant message delivery with secure authentication and message persistence in the database.

CRM Module | Full Stack Project | [GitHub](#)

Role-based CRM platform with ticketing system and activity tracking.

- Developed a full-stack CRM application using Laravel API and React.js with role-based authentication for Admin, Sales User, and Support User.
- Implemented CRUD operations for Leads, Customers, Deals, and Tickets with status tracking and activity logs.
- Built responsive dashboards and forms in React.js enabling efficient customer, deal, and ticket management based on user roles.

Multi-Tenant School Management System | Full Stack Project | [GitHub](#)

SaaS-based school management platform with tenant isolation and role-based access control.

- Built a multi-tenant Laravel application using the Laravel React Starter Kit, with all schools sharing a single database while maintaining tenant isolation through tenant_id on each record.
- Implemented a secure admin panel for each school enabling management of teachers, students, courses, and enrollments.

EDUCATION

B.S. in Electronics and Electrical Communication Engineering, Cairo University 2020 | Grade: Good
Graduation Project: Collision Avoidance and Warning System Using Convolutional Neural Network and V2V Communication | *Sponsored by IHub (Grade: Excellent)*

- Implemented three use cases: Forward Collision Warning, Road Bump Detection, and Pedestrian Detection using TM4C123GXL microcontroller and NVIDIA Jetson Nano.
- Developed V2V communication over a Wi-Fi network and a localization system using GPS.
- **Supervisors:** Dr. Ahmed Hussien and Dr. Samah Elshafiey

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, TypeScript, SQL, HTML, CSS
- **Frameworks/Libraries:** Laravel, Eloquent ORM, React.js, Next.js, Redux Toolkit, Tailwind CSS, React Query
- **Tools & Technologies:** MySQL, OOP, Docker, RESTful APIs, WebSockets, Git, GitHub, Postman

LANGUAGES

- **English:** Intermediate
- **Arabic:** Native
